

# Invisible Invaders

The Hidden Hazards in Your Home's Air

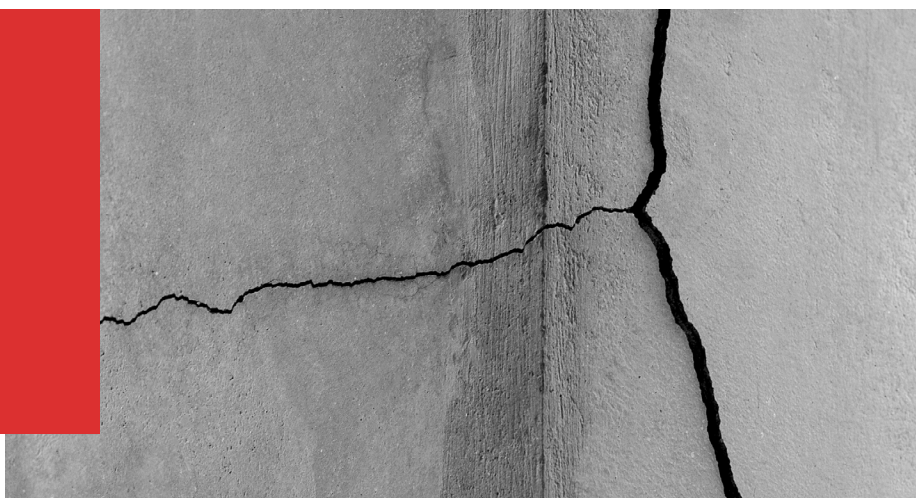

Your home should be a sanctuary, but unseen threats can creep into your space, posing serious health risks.

**Radon**, **mold**, and **allergens** are the invisible invaders—it's time to learn how to battle them and safeguard your air quality.

## The Invaders & Their Dangers

### Radon

The Silent Killer

#### What is it?

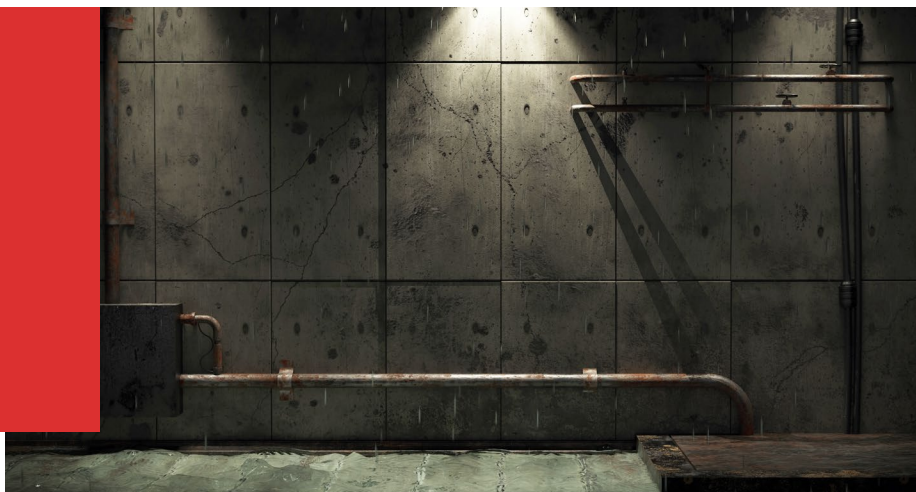

A colorless, odorless gas that enters through foundation cracks.

#### Danger:

- #1 cause of lung cancer in non-smokers.
- Causes 21,000 lung cancer deaths in the U.S. annually.

### Mold

The Moisture Monster

#### What is it?

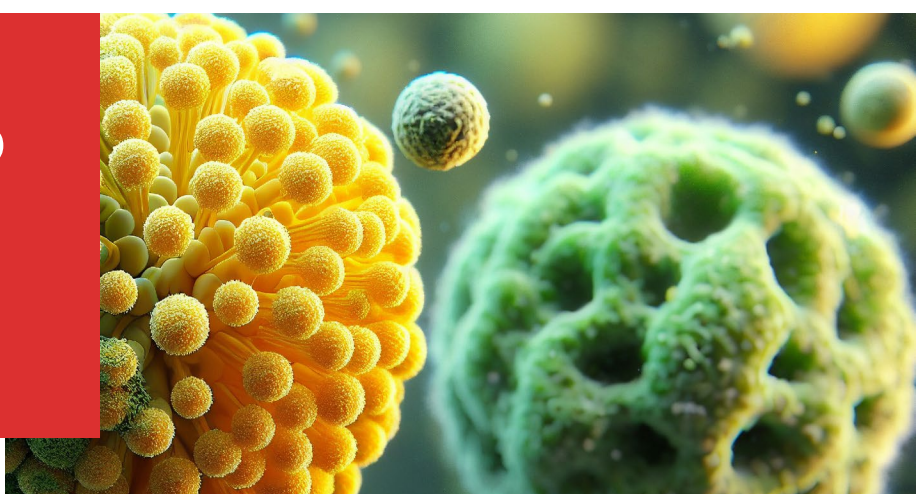

Grows in damp, hidden areas.

#### Danger:

- Triggers allergies and worsens asthma.
- Leads to chronic respiratory issues.

### Allergens & VOCs:

The Airborne Agitators

#### What is it?

Particles from household products, cleaning chemicals, and pets.

#### Danger:

- Aggravates asthma and respiratory conditions.
- Prolonged exposure to VOCs may increase cancer risk.

## Defending Your Home's Air

#### Radon Testing:

Regular testing to detect radon levels and prevent exposure.

#### Air Purifiers:

Use of HEPA filters to remove allergens, VOCs, and other harmful particles.

#### Dehumidifiers & Ventilation:

Reducing moisture levels to prevent mold growth and improve air circulation.
